

Examples of Appropriate Journal Club Titles

Advances in Gene and Cell Therapy

Breaking Barriers: Mechanisms of Cancer Cell Invasion and Metastasis

Cellular Biology of Aging

Closing the Gap: A Closer Look at Health Disparities in America

FREDRICK: Molecular and Cellular Regulation of Health and Disease

Emerging Technologies and Modern Discoveries that Pave the Way for Treatments of Neurological Disorders and Traumas in the 21st Century

SHADY GROVE: Cancer Epidemiology: Etiology, Prevention, and Policy

The Neurobiology of PTSD: Preclinical and Clinical Evidence

Vaccines: Why You Have No Clue What Diphtheria Is

Transcription: Master Regulator of Gene Expression

Human Viruses: Scientific Advances Behind Science Daily Headlines

How Cells Control their Fate: Multidisciplinary Approaches to Investigate Cellular Development

Diagnostic Imaging: How Close Are We to Replacing Radiologists with Machines?

First Revolution of Neuroscience in 21st Century: Controlling the Brain with Lights

The Dark Art of Cellular Alchemy: Leprosy, Viruses, and Stem Cell Reprogramming

Them and Us: The Role of the Gut Microbiome in Human Health and Disease
