DON'T MISS A THING!

SIGN UP FOR THE SUMMER INTERNSHIP PROGRAM (SIP) LISTSERV

Summer Email List

The OITE-SIP email List was created to promote a sense of community among student researchers and to provide a forum for the exchange of educational, scientific, and employment information during the months you spend at the NIH.

To subscribe:

https://www.training.nih.gov/listservs

Check your email frequently for important information on summer opportunities!

CREATE A MYOITE ACCOUNT

If you have an activated NIH email account, create a MyOITE account with user type “NIH Trainee/Fellow” and trainee type “Summer Intern” for yourself on the OITE website so that you can register for events, make appointments with career counselors, participate in Summer Poster Day, and access the Alumni Database. If you do not have and will not get an NIH email account, watch your email for directions for how to create your MyOITE account. If you would like to register for events before you arrive at the NIH or have your NIH email address, you can do so by selecting user type “Guest.”

For more information about summer intern accounts go to:

https://www.training.nih.gov/oite_accounts

To create an account:

http://www.training.nih.gov/register
May 2018

A Message to All Summer Research Program Participants:

On behalf of all the members of our scientific community, I would like to welcome you to the National Institutes of Health (NIH). It is my sincere hope that your experience with us this summer will enhance your knowledge, understanding, and appreciation of the world of biomedical research and will contribute to the development of your academic and career goals. Over the years, participation in this program has motivated many individuals like you to pursue careers in the biomedical sciences.

While you will undoubtedly be spending most of your time this summer in your research group, I highly encourage you to take advantage of the many special opportunities we have to offer. The NIH Office of Intramural Training & Education has organized several activities designed to enrich your summer experience. One of these is the very popular Summer Lecture Series. At these lectures, leading NIH scientists will discuss their current research in presentations designed just for you. Be sure to arrive early to get a seat.

Poster Day 2018, another special event, held this year on August 9th, provides you the opportunity to present your summer research findings to the broader NIH scientific community. I encourage all summer students to take part in this NIH-wide event, which recognized the work of more than 991 students in 2017. You will find a description of the registration procedure and guidelines for creating a poster in this handbook.

You are likely to notice, through the Lecture Series, Poster Day, or your discussions with other summer interns, that NIH investigators use a wide array of techniques and approaches. This reflects the NIH conviction that, in the twenty-first century, important biomedical problems will be solved by combining the knowledge and skills of engineers, mathematicians, chemists, pharmaceutical scientists, physicists, and experts in computer science and bioinformatics, as well as biologists. Working in teams, investigators with diverse scientific, educational, and cultural backgrounds represent the key to the progress on which our nation’s health depends.

We expect you to complete laboratory and radiation safety courses that teach valuable skills and ensure that your summer with us will be a safe one. We will also be offering sessions called “Planning a Successful NIH Summer Internship” that will help you hit the ground running. Finally, I highly recommend that you take advantage of OITE workshops and talks that will assist you with planning your career.

Congratulations on your selection for an internship and best wishes for a rewarding summer at the NIH!

Sincerely yours,

/Michael M. Gottesman, MD/
Deputy Director for Intramural Research
National Institutes of Health

NIH Summer Handbook 2018 | 3
The Office of Intramural Training & Education is responsible for ensuring that your experience in the NIH Intramural Research Program is as rewarding as possible. We are here to help all NIH trainees become creative leaders in the biomedical research community, but you must take the initiative to make the most of your time at the NIH. You need to make certain that, when you leave the NIH, you take with you the technical, communication, problem solving, and interpersonal skills you will need as you move forward in your career.

Research should be your highest priority while you are at the NIH. OITE aims to ensure that you also take part in relevant career development activities, learn all you can from the scientific staff at the NIH and your fellow trainees, and have a good time. In addition, OITE staff members are available to help you resolve any problems that might arise during your time at the NIH.

Specifically, we encourage you to

- join the staff of OITE for Planning a Successful NIH Summer Internship, except if you are new to research;
- if you are new to research, attend the Summer Science Boot Camp instead of Planning a Successful NIH Summer Internship to get in shape for your NIH research experience;
- attend orientation in your Institute/Center;
- make certain that you are included on the official OITE summer mailing list OITE-SIP;
- if you have an activated NIH email account, create an “NIH Trainee/Fellow” account for yourself on the OITE website so that you can make appointments with career counselors, participate in Summer Poster Day, and access the Alumni Database, see https://www.training.nih.gov/oite_accounts. If you do not have an NIH email account, watch your email for further directions;
- visit the OITE website, https://www.training.nih.gov, regularly to check for new opportunities; remember that if you cannot attend a workshop you will find video- and pod-casts of many of them on the OITE website at https://www.training.nih.gov/oite_videocasts;
- check out our online resources (https://www.training.nih.gov/nih_resources) for help with things like keeping a lab notebook, reading a scientific article, attending a scientific meeting, writing professional email, and mastering lab math;
- participate in appropriate career and professional development workshops;
- make use of the OITE Career Library;
- attend the Summer Lecture Series, presented by some of the most respected investigators at the NIH;
- share your research with the NIH community at Summer Poster Day;
- sign up with our Career Services Center for pre-professional and graduate school advising or help exploring careers;
- create a LinkedIn account and join the NIH Intramural Science group to network and share ideas;
- visit the OITE Careers Blog, https://oitecareersblog.wordpress.com; and
- explore and contribute to the community around you.

OITE programs complement the training activities of the NIH Institutes and Centers (ICs). OITE is located on the second floor of Building 2. We maintain an open-door policy and encourage you to drop by anytime.

**OITE STAFF**

The OITE encompasses several biomedical research training programs: the Postbacalaureate and Summer Research Program (PSRP), the Graduate Partnerships Program (GPP), and the Office of Postdoctoral Services (OPS). You will likely interact primarily with staff members in the office who are involved with your particular appointment.

To ask a question about a particular training program or OITE function, please refer to: https://www.training.nih.gov/contact

To find the current contact information of specific staff members visit: https://www.training.nih.gov/staff
PLANNING A SUCCESSFUL NIH SUMMER INTERNSHIP!

Your research project should be your number one priority. But there is much more to discover in the summer program. Join the staff of the OITE for Planning a Successful NIH Summer Internship. We will share advice and tips on making the most of your time at the NIH. Sessions are scheduled for 8:30 to 10:00 am, the second, third, and fourth Fridays in June, in Building 35, Room 610 (ground floor) or Building 50, Room 1227/1328.

IMPORTANT NOTE: if you are brand new to research, consider registering for and attending one of the half-day Summer Science Boot Camps instead of Planning a Successful NIH Summer Internship. Boot Camps are scheduled for June 25 and 29 on the Bethesda campus. Arrangements will be made to transport interested summer interns from Frederick and Baltimore for the June 29th Boot Camp.

<table>
<thead>

</tr>
</tbody>
</table>

**Summer Science Boot Camp**

- June 25, half-day | NIH Bethesda Campus, Building 10, FAES Classrooms 3/4
- June 29, half-day | NIH Bethesda Campus, Building 1, Wilson Hall (third floor)

OITE WEBSITE

The OITE website, [https://www.training.nih.gov](https://www.training.nih.gov), can provide you with valuable information during your stay at the NIH. Notices of important events are posted on the homepage under “What’s New” and “Upcoming Events.” You should visit this site to find professional development resources, information about NIH training programs, and career information. You will also use this site to register for career development activities and complete program evaluations.

OITE ONLINE RESOURCES

The OITE website contains YouTube videos and other training materials designed to help with your professional development. New materials are being added all the time. Resources include videos on keeping a good lab notebook, reading a scientific article, lab math, attending a scientific meeting, and choosing a research mentor. Online resources include guides to writing professional emails and cover letters and creating CVs and résumés. Check out these resources and others at [https://www.training.nih.gov/nih_resources](https://www.training.nih.gov/nih_resources).

THE CAREER SERVICES CENTER

The OITE Career Services Center was established in 2007 to serve all trainees on NIH campuses. Our goal is to ensure that NIH trainees are aware of the many jobs available, both at and away from the bench or clinic, and to provide the resources to help them identify and pursue good individual career options. Our career counselors run workshops, lead small group discussions, and schedule individual appointments available to all trainees. These are designed to assist trainees in self-assessment, career exploration, goal setting, and finding positions. Staffing includes:

- pre-professional advisors, who can talk with you about the decision to go to graduate or medical school, choosing schools and programs, strategies for taking the MCAT or GRE successfully, filling in gaps in your credentials, writing personal statements, and interviewing;
- career counselors, who can assist you with figuring out “what you want to be when you grow up” by analyzing your strengths, weaknesses, and values; help you write resumes and CVs; and coach you through the job search process; and
- counselors and wellness advisors who can help you to develop a more assertive presence, deal with interpersonal conflicts that might arise in the lab, manage time and stress, and handle personal issues.

USING THE SUMMER HANDBOOK

This handbook is a useful guide to the summer experience on the main NIH campus in Bethesda. General topics will apply to all summer students, but if you are not working at the main campus, some details may differ. For example, safety training in North Carolina will be arranged by the NIEHS, and parking arrangements are campus-specific.

Use the sections in this handbook as a guide to the issues you should investigate regardless of your location. OITE staff members will be visiting trainees at all locations and are available to answer your questions.

Please direct comments for improving this handbook to Dr. Yewon Cheon at cheony@mail.nih.gov.
To schedule one-on-one appointments with these individuals please visit https://www.training.nih.gov/career_services/appointments. Remember, you will need a MyOITE account with user type “NIH Trainee/Fellow” to register for career services appointments. If you are in or near Bethesda, your appointments will be in Building 2 on the main campus. If you are at another NIH location, the counselors/advisors will come to you or we will arrange phone interviews. Keep your eyes open for announcements.

Efforts of the Career Services Center staff are supplemented by the OITE Career Library, which is housed on the second floor of Building 2 in Bethesda. Career Libraries are also located in Baltimore in the Biomedical Research Center (BRC), Room 04B409B for NIA and Room 2A641 for NIDA, and in Frederick in the Science Library, Building 549.

GETTING OFF TO A GOOD START: SETTLING IN TO YOUR NEW RESEARCH GROUP

Fitting comfortably into your research group and developing good relationships with your coworkers should be your first priorities. Each research unit has its own ways of doing things. You will have to determine for yourself what the unwritten “rules” are for yours. What hours do most people work? Is there a standard for maintaining notebooks? When and where are group meetings held? Are reagents shared? If so, what is the system for ensuring that stocks are replaced when they get low? What training courses do you need to complete? What computer programs are used? What is the dress code? How much chatting goes on? Are iPods and cell phones in use?

You can learn some things by being a careful observer. Others you will have to ask about explicitly. In all cases, be courteous and enthusiastic. Write down any and all directions. Make certain to do more than your share to keep the lab or office running smoothly.

IF PROBLEMS ARISE

Where there are people, there can be conflict. Some conflicts are minor irritations that are quickly forgotten. Others are more serious, requiring you to talk to and negotiate outcomes with your co-workers and/or mentor. We hope that the conflict and tensions you experience will be minor and that you view them as opportunities to improve your interpersonal skills. However, even with the best of intentions, some group dynamics are poor; you may find yourself embroiled in serious or complicated situations. Remember: You are not alone! The NIH has resources to help you deal with any interpersonal issues that may arise.

If you are experiencing conflict with someone in your research group, speak with him or her directly. If that does not resolve the issue, speak with your Principal Investigator (PI). If you are not comfortable doing that, or if the situation is not easily resolved, seek advice from other mentors (i.e., your IC training director, OITE staff, other colleagues) who can help you consider the issues from different perspectives as you attempt a reasonable resolution. If you have concerns about your interactions with your PI, it is important to talk with someone you trust. Hopefully you will have developed relationships with your training director or with more senior students or postdocs in the group. Also, feel free to contact Dr. Milgram or Dr. Sokolove in the OITE to confidentially discuss any issues that develop.

Some reasons to immediately contact the training director in your IC, or Dr. Milgram or Dr. Sokolove in the OITE, are issues of possible scientific misconduct, harassment of any type, and safety concerns. If we are not able to assist you, we will help you access other campus resources, such as the Office of the Ombudsman Center for Cooperative Resolution, the Employee Assistance Program, and CIVIL, a program that promotes civil behavior in the NIH workplace.
Founded in 1887, the National Institutes of Health is one of the world’s foremost medical research centers and the Federal focal point for medical research in the United States. NIH is the steward of medical and behavioral research for the Nation. Its mission is the pursuit of fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to extend healthy life and reduce illness and disability.

The goals of the NIH are to

- foster fundamental creative discoveries, innovative research strategies, and their applications as a basis for ultimately protecting and improving health.
- develop, maintain, and renew scientific human and physical resources that will assure the Nation’s capability to prevent disease.
- expand the knowledge base in medical and associated sciences in order to enhance the Nation’s economic wellbeing and ensure a continued high return on the public investment in research.
- exemplify and promote the highest level of scientific integrity, public accountability, and social responsibility in the conduct of science.

In realizing these goals, the NIH provides leadership and direction to programs designed to improve the health of the Nation by conducting and supporting research

- in the causes, diagnosis, prevention, and cure of human diseases.
- in the processes of human growth and development.
- in the biological effects of environmental contaminants.
- in the understanding of mental, addictive, and physical disorders.
- in directing programs for the collection, dissemination, and exchange of information in medicine and health, including the development and support of medical libraries and the training of medical librarians and other health information specialists.

INSTITUTES AND CENTERS (ICs)

OF THE NIH

The NIH is one of the eleven agencies of the U.S. Department of Health and Human Services (DHHS), along with the Food and Drug Administration (FDA), the Centers for Disease Control and Prevention (CDC), and the Centers for Medicare and Medicaid Services (CMS). The NIH is composed of 27 separate Institutes and Centers (ICs) and the Office of the Director (OD). Each IC has its own mission of supporting biomedical research and training, in the intramural (here at the NIH) and/or extramural (at universities and research institutes worldwide) research communities. All but three ICs receive their funding directly from Congress and administer their own budgets. The 27 ICs are listed below. Those shown in bold type participate in the Intramural Research Program.

CC—NIH Clinical Center
CIT—Center for Information Technology
CSR—Center for Scientific Review
FIC—John E. Fogarty International Center
NCATS—National Center for Advancing Translational Sciences
NCCIH—National Center for Complementary and Integrative Health
NCI—National Cancer Institute
NEI—National Eye Institute
NHGRI—National Human Genome Research Institute
NHLBI—National Heart, Lung, and Blood Institute
NIA—National Institute on Aging
NIAAA—National Institute on Alcohol Abuse and Alcoholism
NIAID—National Institute of Allergy and Infectious Diseases
NIAMS—National Institute of Arthritis and Musculoskeletal and Skin Diseases
ACRONYMS

The previous list of IC names should have convinced you that we at NIH speak in acronyms; here is a list of other common abbreviations to help you communicate in your new surroundings.

ACUC—Animal Care and Use Committee
AO—Administrative Officer
CAN—Common Accounting Number
CCSEP—Community College Summer Enrichment Program
C-SOAR—College Summer Opportunity to Advance Research
CIT—Center for Information Technology
CRTA—Cancer Research Training Award
CV—Curriculum Vitae
DDIR—Deputy Director for Intramural Research
EAP—Employee Assistance Program
EDI—Office of Equity, Diversity, and Inclusion
EEO—Equal Employment Opportunity

FAES—Foundation for Advanced Education in the Sciences
FNIH—Foundation for NIH
FTE—Full-Time Equivalent
FY—Fiscal Year
GPP—Graduate Partnerships Program
G-SOAR—Graduate Summer Opportunity to Advance Research
HiSTEP—High School Scientific Training and Enrichment Program
IC—Institute/Center
IRP—Intramural Research Program
IRTA—Intramural Research Training Award
NED—NIH Enterprise Directory
NRC—National Research Council
NSF—National Science Foundation
OHRM—Office of Human Resource Management
OHSR—Office of Human Subjects Research
OIR—Office of Intramural Research
OITE—Office of Intramural Training & Education
OMS—Occupational Medical Service
OPM—Office of Personnel Management
ORS—Office of Research Services
ORWH—Office of Research on Women’s Health
PI—Principal Investigator
PIV—Personal Identity Verification
SD—Scientific Director
SEEP—Student Educational Employment Program
SIP—Summer Internship Program
TSP—Thrift Savings Plan
UGSP—NIH Undergraduate Scholarship Program
VF—Visiting Fellow
WALS—Wednesday Afternoon Lecture Series

For a comprehensive list, see: http://www.nih.gov/employee/acronym.html
NIH CAMPUSES

The main NIH campus is located in Bethesda, Maryland, just 10 miles from the center of Washington, DC. Important offices located on the Bethesda campus include the Office of the Director, the Office of Intramural Research, and the Office of Intramural Training & Education, which oversees NIH-wide training. A large number of research facilities, offices, and institutional resources are spread across more than 300 acres, in over 75 buildings, on the Bethesda campus.

Many NIH scientists conduct their research in laboratories located on the main campus in Bethesda, but others work on NIH campuses across the country. Other NIH facilities where students may train include:

- the Framingham Heart Study of the NHLBI in Framingham, MA;
- the NIA and NIDA in the Biomedical Research Center, in Baltimore, MD;
- the Twinbrook Cluster, Executive Plaza, and Shady Grove in Rockville, MD, less than 8 miles from the NIH Bethesda campus;
- NCI Frederick Cancer Research and Development Center (FCRDC) at Fort Detrick in Frederick, MD;
- the NIH Animal Center in Poolesville, MD;
- the NIEHS facility in Research Triangle Park (RTP), NC;
- the Rocky Mountain Laboratories of the NIAID in Hamilton, MT;
- the Perinatology Research Branch of the Eunice Kennedy Shriver NICHD in Detroit, MI; and
- the Phoenix Epidemiology and Clinical Research Branch (PECRB) of NIDDK in Phoenix, AZ.
UNDERSTANDING INSTITUTE/CENTER ORGANIZATION AND ADMINISTRATION

The organizational structure of the NIH is both similar to and different from that of most universities. Universities are typically organized around schools and colleges (e.g., School of Medicine, School of Public Health) that are subdivided into departments and units. The NIH consists of Institutes and Centers (ICs), similar to the schools/colleges found in many academic institutions. All NIH faculty have a primary appointment in one IC; this IC provides space, funding, and administrative support for the research group and is the “intellectual home” for all personnel there. Like faculty at universities, NIH faculty can have adjunct/joint appointments in other ICs. In addition, mechanisms to facilitate interaction across ICs have been formalized so that scientists and clinicians with common interests can easily interact and collaborate.

IC intramural research programs are organized as follows:

• Individual tenure-track or senior investigators (also known as principal investigators or PIs) head their own units/labs/research groups, which include trainees, technicians, staff scientists, and administrative support personnel.
• Multiple units form a Section, which is headed by a Section Chief.
• A Lab or Branch, headed by a Lab or Branch Chief, consists of two or more Sections and possibly one or more additional units. Large Labs and Branches may include 10 to 12 PIs, but in general a Lab or Branch consists of 4 to 8 PIs. Originally the distinction was that Branches had at least one clinical investigator, while Labs contained only basic scientists – this distinction has somewhat fallen by the wayside.

You should make an effort to meet the other scientists, trainees, and support staff in your Lab/Branch and in your IC.

WHO CONDUCTS BIOMEDICAL RESEARCH AT THE NIH?

Research groups at the NIH vary greatly in size. A small group may have only a few staff members, while a large group may include thirty. Regardless of size, fitting in with this team and contributing to its productivity should be one of your major goals. Take time to consider seriously the best ways for you to interact with your co-workers.

Your research group may include individuals from some or all of the following groups.

Principal Investigators: Principal investigators hold a doctoral degree. They can be either senior (tenured) or tenure-track investigators. These individuals run their own labs and have the authority to hire all of the remaining groups of scientists.

Staff Scientists: Staff scientists generally hold a doctoral degree. Although they are not principal investigators, they are extremely accomplished scientists. In addition to doing and directing research, they often fulfill key functions such as managing the laboratory of an extremely busy PI or running a core facility that provides services to many investigators.

Clinical Fellows: Clinical fellows are individuals who hold a professional doctoral degree (e.g., MD or DDS), have recently completed their internships and residencies, and are at the NIH both to provide clinical services and to conduct research.

Postdoctoral Fellows: More than 3,100 individuals who have recently received a doctoral degree are continuing their research training at the NIH. They are generally called Postdoctoral IRTAs (CRTAs if they are working in the NCI) if they are U.S. citizens or permanent residents and Visiting Fellows if they are citizens of another nation.

Graduate Students: The NIH is the research home for more than 400 graduate students. They complete their coursework at and receive their degrees from their university and conduct all or part of their dissertation research at the NIH.

Medical/Dental Students: Medical/Dental students who have the permission of their institutions can spend one or two years conducting research at the NIH through the Medical Research Scholars Program. About 70 students participate in this program. Medical/Dental students can also complete clinical electives at the NIH.

Postbac Trainees: A group of more than 1200 students who have completed their undergraduate work, postbacs conduct research at the NIH for 1 to 3 years before continuing on to graduate or professional school.

Summer Interns: This group includes you! Each summer about 1300 high school, college, graduate, and professional students spend eight to ten weeks working in the Intramural Research Program. These individuals must be at least sixteen years of age and U.S. citizens or permanent residents.
Wellness Resources at the NIH

Life in a research lab, and life in general, can be stressful. It is important to find time for yourself and your family, even when balancing work and life seems challenging. The NIH provides many resources to help you maintain a healthy life balance, learn stress management techniques, and make the most of challenging situations—at work and at home.

We in the OITE are happy to speak with you confidentially regarding lab conflicts, applications to graduate or professional school, career progression, and issues at home that are affecting your work. You can make an appointment with an OITE staff member, someone in the Career Services Center, or one of our wellness counselors (https://www.training.nih.gov/career_services#Career%20Staff).

We may refer you to other NIH resources and, when appropriate, we will offer to help you speak with your mentors. Realize that a summer research experience will have its challenging moments – trainees who take advantage of all of the resources available to them deal more effectively with these challenges.

Here are some NIH resources that can help you take care of yourself.

OITE Wellness Resources

Mindfulness Meditation Groups: Would you like to have at least one time a week that you could slow down and connect with yourself? OITE drop-in meditation groups are offered to trainees/fellows as a support for self-care and enhanced wellbeing as part of the OITE Wellness Program. Each 30-minute session involves a few minutes of instruction followed by approximately 20-25 minutes of meditation practice. The facilitator will be available after the session for questions and brief discussions. These groups are open to both beginners and experienced meditators; attendance can be on a drop-in basis - come as much as you like! Please arrive a few minutes prior to the start time (either 5:00 pm on Thursdays or noon on Tuesdays) in order to check in and get settled for practice. All trainees are welcome!

NIH Communities: A large part of feeling comfortable in your work environment is having a community with whom to share the experience. The NIH is a big place; we can almost guarantee that you will be able to find a community that will make you feel at home. Communities at the NIH include an NIH chapter of SACNAS (the Society for the Advancement of Chicanos/Hispanics and Native Americans in Science), LGBT Fellows and Friends, the Network of African-American Fellows (NAAF), and many more. You will find a list and contact information at https://www.training.nih.gov/you_are_not_alone.

Fitness Centers

https://govemployee.com/nihrw-services-membership/Fitness-home/

NIH fitness centers are run by the NIH Recreation and Welfare (R&W) Association. Services include weight rooms, aerobics, yoga classes, weight watchers, and personal trainers. Centers are located in Building 31C, Room B4 C18, 301.496.8746, and Rockledge I, Room 5070, 301.435.0038. Students are eligible for a reduced rate: $13-20 per month, if you sign up for a year, depending on the plan you choose.

NIH Recreation & Welfare Association (R&W)

R&W Office: 301.496.6061
https://govemployee.com/nihr

The Recreation and Welfare Association (R&W) is an organization designed to provide trainees and employees at NIH with a variety of social, athletic, wellness, educational, and special interest activities. R&W publishes a monthly newsletter describing services on campus and also offers planned excursions and discounted tickets to various activities and events. Additionally, the Association runs the fitness centers and gift shops located throughout campus. R&W membership is free, but preferred membership ($9.00 per year) is required for fitness center access and discounted tickets, etc.

If you are on the Frederick campus, check out the volunteer-run recreation and welfare group there by visiting their Facebook page: https://facebook.com/RWClubFrederick.

Occupational Medical Service (OMS)

Building 10, 6C306, 301.496.4411
https://www.ors.od.nih.gov/sr/dohs/HealthAndWellness/OccupationalMedical/Pages/oms_main.aspx

Occupational Medical Service (OMS) provides NIH employees and trainees with information and occupation-related medical care to help them perform their jobs in a safe and healthy work environment. OMS conducts preplacement evaluations to review job duties, provides work-related immunizations, and enrolls NIH employees in surveillance programs for public health hazards at their work site (for example, noise, animals, and M. tuberculosis). OMS provides clinical care for occupational injuries and illnesses and offers administrative assistance with claims for Federal Workers’ Compensation benefits.
WHAT IF I GET SICK?
The hospital closest to the NIH is Suburban Hospital, located at 8600 Old Georgetown Road in Bethesda. The main hospital number is 301.896.3100. You can reach the Physician Match information and referral service at 301.896.3939 from 8:30 am to 5:00 pm, Monday through Friday.

How you select a physician will depend on your health insurance. It is best to figure this out before you need medical attention.

Make certain to carry proof of health insurance with you at all times, just in case you need access to emergency health services.

WHAT IF I NEED HELP?
https://www.ors.od.nih.gov/sr/dohs/HealthAndWellness/EAP/Pages/index.aspx

Sometimes things happen: a parent passes away, you suspect a child is being abused, you have been abused, you want help stopping smoking, you are experiencing a mental health crisis. The NIH Employee Assistance Program (EAP) is available to assist summer interns with difficult transitions and situations that are negatively influencing their ability to work. You can call 301.496.3164 to inquire about their services or make an appointment. EAP is located in Building 31, Room B2B57. It also maintains a list of helpful phone numbers that will connect you with Crisis Centers, smoking cessation centers, and self-help groups. 211 is also a number you can call to find out about state resources.

OTHER NIH RESOURCES

CAFETERIAS
For a map of cafeterias, coffee bars and concession stands see https://www.ors.od.nih.gov/pes/dats/food/Pages/index.aspx.

- Building 10, Second Floor
- Building 10, First Floor, north entrance to CRC
  (only soups, wraps, coffee, snacks)
- Building 10, B1-Level
- Building 12B, First Floor
- Building 31, First Floor
- Building 35, First Floor
- Building 38A, B1 Level
- Building 45 (Natcher Conference Center), First Floor

COFFEE BARS
- Building 10 FAES, 301.594.9013
- Building 10 CRC, 301.451.7709
- Building 35, 301.594.8438
- Building 50, 301.402.0594
- Fishers Lane, 301.770.8901

CONCESSION STANDS/CONVENIENCE STORES
- Building 10, Room B1-C20, 301.496.3087
- Building 12B, Room 1N-108, 301.402.2919
- Building 31, Room 1W08, 301.496.6230
- Building 35, Room GC202, 301.496.3635
- Building 45, Room 1A0-02, 301.435.4697
- Neuroscience Center (NSC) Building, 6001 Executive Blvd, Lobby, 301.435.1468

FAES BOOKSTORE
https://faes.org/content/faes-bookstore-nih
- Building 10, Room 1N241, 301.496.5272

LOST AND FOUND
Same Day:
- Parking Lots (Employees and Visitors): 301.656.9008
- Employee Shuttles: 301.435.4010
- Patient Shuttles: 301.496.1161
- Gateway Center: 301.435.7554
- Commercial Vehicle Inspection Facility (CVIF): 301.443.6843

After 24 Hours (and for locations not listed above):
- NIH Police: 301.496.2387
- Weekends: 301.496.5685

Ultimately, all lost and found items end up with the NIH Police, usually within 24 hours.

R&W GIFT SHOPS

The Recreation and Welfare Association (R&W) runs several gift shops located throughout the NIH.

- Building 10, Room B1C06, 301.496.1262
- Clinical Research Center, 301.451.7708
- Building 31, Room 1A08, 301.496.6061
- Rockledge I, Room 4202, 301.435.0043
NIH GRADUATE AND PROFESSIONAL SCHOOL FAIR FOR POSTBACS AND SUMMER INTERNS

July 18, 2018
9:00am – 3:30 pm
Natcher Conference Center (Building 45)

The NIH Graduate and Professional School Fair provides an opportunity for NIH summer interns (especially those in college) and NIH postbacs, as well as other college students in the DC area, to prepare for the next step in their careers by exploring educational programs leading to the PhD, MD, DDS, MD/PhD, and other graduate and professional degrees. More than 200 outstanding colleges and universities from across the U.S. will be sending representatives of their graduate schools, medical and dental schools, schools of public health, and other biomedically relevant programs to the Fair in the hopes of recruiting NIH trainees.

The day will also include workshops on getting to graduate and professional school, MD/PhD programs, interviewing, and careers in public health, psychology, and dentistry and mixers to allow fair attendees to talk to program directors and scientists in areas like bioinformatics, bioengineering, psychology, and dentistry.

To register go to https://www.training.nih.gov/gp_fair

MARK YOUR CALENDAR!

2018 SUMMER LECTURE SERIES

July 11, 2018
From the Human Genome Project to Precision Medicine: A Journey to Advance Human Health
Eric D. Green, MD, PhD
Director
National Human Genome Research Institute
2:00 - 3:00 pm
Lipsett Amphitheater, Building 10

July 31, 2018
The 21St Century Library: Accelerating Discovery, Disseminating Knowledge, Preserving History
Patricia Flatley Brennan, RN, PhD
Director
National Library of Medicine
11:00 am - 12:00 pm
Wilson Hall, Building 1

Accommodations
To request sign language interpreters and/or other accommodation, please contact NIH Interpreting Services by phone at 301.402.8180, by submitting a request online (http://www.ors.od.nih.gov/pes/dats/interpret/Pages/index.aspx), or by using the Federal Relay Service at 1.800.877.8339. Requests should be made at least 5 days in advance of the event.
NIH LIBRARY ORIENTATION TOURS

Available on request June through July, 2018
Building 10, Room 1L-25
First floor – South entrance
301.496.1080, nihlibrary@nih.gov
http://nihlibrary.nih.gov

The NIH Library provides print and online resources to support the work of the NIH community as well as an extensive and comprehensive range of scientific, medical, social science, and administrative information and services. Whatever your information needs, the NIH Library staff can support your research requirements and save you time.

The NIH Library provides the following services and resources to support the work of the NIH community:

• Access to 10,000+ full text, online journals; 4,000+ online books; 50 databases; 1,000+ Internet resources; and a collection of over 30,000 printed books (open stacks)
• Document delivery (journal articles, books, book chapters, dissertations, slides, etc.)
• Reference and research assistance
• Expert literature searches
• Translation services
• Self-service photocopying
• Resource and database training (group or individual)
• NIH Library Bioinformatics Program
• NIH Library Writing Center
• Journal and research alert services
• Library facility with computer and wireless access, comfortable seating, private study carrels, open stacks, and ample study space

Attend a NIH Library Orientation Tour to learn about the online and in-house special collections and resources available to you while you are at NIH. The orientation includes a physical tour of the library facility and features a demonstration of the NIH Library website. Tours for large groups or special arrangements are available on request. To learn more about the scope of services available to you, please contact or visit the NIH Library Information Desk: 301.496.1080 or nihlibrary@nih.gov.

NATIONAL LIBRARY OF MEDICINE TOURS

The National Library of Medicine (NLM), part of the National Institutes of Health, is the world’s largest medical library with nearly 28 million items in its collection plus a wealth of online information resources. The main reading room and History of Medicine Division reading room are located in Building 38 and are open Monday through Friday from 8:30 am to 5:00 pm, with the exception of Federal holidays. Librarians are available to help access materials in the collection. Materials may not be checked out of the library; NLM does not loan materials to individuals. NLM does loan them to other libraries, including the NIH Library in Building 10.

In addition to its physical collection, NLM produces many online resources including groundbreaking tools such as PubMed and Clinicaltrials.gov. NLM, like other NIH components, conducts and funds research. Its focus is biomedical informatics, using communications and computing technology to improve the way scientific and health information is delivered to consumers, health providers, and researchers.

NLM offers tours exploring the library’s resources, history, art, and architecture Monday through Friday from 1:30 to 2:30 pm. Tours start in the NLM Visitor Center in Building 38A. Reservations for groups of five and larger are appreciated and can be made by emailing Tara Mowery at tara.mowery@nih.gov.

Guests also are welcome to explore the smaller and more frequently changing educational displays in the History of Medicine Division reading room.

APPLYING TO PROFESSIONAL OR GRADUATE SCHOOL

MEDICAL SCHOOL OVERVIEW

Make your application to medical (or dental) school the best it can be! If you are planning to apply to medical (or dental) school, you will want to attend the “Medical School Overview” workshop. This workshop addresses important issues concerning medical school applications, including deciding where to apply and writing personal statements, as well as other useful tips for completing your application.
GRADUATE SCHOOL OVERVIEW
If you are planning to apply to graduate school, you should plan to attend the “Graduate School Overview” workshop. This workshop will provide tips on choosing and applying to a graduate school/program. Additionally, it will guide you through the process of planning and writing your personal statements. This workshop does not cover the GRE or interviewing.

SUMMER INTERN JOURNAL CLUBS
Journal clubs are a popular way for scientists interested in particular areas of research to get together and discuss recently published scientific papers. They allow participants to stay up-to-date with new techniques and advances in the field. The summer intern journal clubs are your opportunity to participate in this form of scientific communication, while meeting other summer students, sharpening your critical reading skills, and learning more about your area of interest. Journal clubs will be led by NIH graduate students and postdocs; they will meet weekly for four or five weeks during the summer. Descriptions and registration information for journal clubs offered this summer can be found at https://www.training.nih.gov/summer_intern_journal_clubs. A broad range of topics will be offered, covering human genetics and disease, biophysics, computational biology, and other topics. If you plan to participate in a summer journal club, we ask that you attend the “Summer Science Boot Camp” session on reading journal articles or watch the “Reading A Scientific Article” YouTube video.

SCIENCE SKILLS AND CAREER DEVELOPMENT ACTIVITIES

SUMMER SCIENCE BOOT CAMP
Are you new to research? This half-day interactive training program is designed for summer students with little or no prior research experience. Come develop the skills you need to be successful in science! Our aim is to increase your confidence and ability to get help when you need it. Topics will include:

• NIH structure and organization
• SIP structure and resources
• Goal setting
• Expectations in a lab/research group environment
• Communication, especially asking for help
• Imposter theory and resilience
• Science skills
  – Keeping a lab notebook
  – Reading a scientific paper
  – Lab math

Summer Science Boot Camp is designed with high school students and recent graduates in mind. If you are already in college, please contact Dr. Cheon (cheony@mail.nih.gov) before registering.

To register, see https://www.training.nih.gov/boot_camp.

READING A SCIENTIFIC PAPER (YOUTUBE VIDEO)
New research findings are communicated to the scientific community via scientific papers, and being able to read these papers and make use of the information they contain is key to successful research. However, reading a scientific paper can be extremely challenging for students who don’t have much experience. This Webinar, created by Dr. Rocio Benabentos, formerly of the National Institute of Dental and Craniofacial Research, will teach you how to get the most out of each paper you read. Questions addressed will include:

• Why do scientists read papers?
• How do you decide which papers to read?
• How can you most efficiently find the important information in each paper?
• How do you critically evaluate a paper?

To view the YouTube video go to: https://www.training.nih.gov/oite-yt/readingascientificpaper

YOUTUBE PLAYLIST CREATED ESPECIALLY FOR YOUNG SCIENTISTS
See https://www.training.nih.gov/oite-yt/resourcesforyoungscientists

This resource includes videos on
• reading a scientific paper,
• keeping a lab notebook,
• attending your first scientific meeting, and
• getting comfortable with lab math

CREATING AND PRESENTING DYNAMIC POSTERS
Are you getting ready for Summer Poster Day? This presentation will focus on the scientific and artistic components of creating a poster. The workshop will discuss selecting and organizing your data, what to include and what not to include, the key components of a successful poster, layout and font selection, and poster presentation techniques.

Poster Preview
Are you uncertain what scientists mean when they talk about presenting a poster? Drop by to take a look at and discuss several posters recently presented by trainees at the NIH. The poster preview will occur immediately after the workshop “Creating and Presenting Dynamic Posters.”
TALKING SCIENCE: DESIGNING AND DELIVERING SUCCESSFUL ORAL PRESENTATIONS
Science isn’t complete until the results have been shared with interested others, and talking about your results is one of the important ways of making them public. This presentation will address topics including the anatomy of a science talk, creating successful slides, delivering your content convincingly, ensuring that your talk is well-received, and answering questions. The information will help you with presentations in group meetings and perhaps talking about your findings when you return to school.

ESSENTIAL LEADERSHIP SKILLS FOR FUTURE SCIENTISTS AND HEALTH CARE PROFESSIONALS
This experiential and engaging course, rooted in psychological type and the Myers-Briggs Type Indicator assessment, explores themes of self-awareness and self-management. Through exercises, lecture, and small group discussions, you will learn about and validate your own type preferences. You will also explore your work and communication styles.

BUILDING RESILIENCE: A KEY TO SUCCESS IN RESEARCH AND EDUCATIONAL ENVIRONMENTS
Navigating new jobs, the career exploration process, and research can seem overwhelming and lead us to doubt ourselves just when we need confidence the most. In this interactive workshop, we will discuss attitudes and behaviors that can get in our way and explore strategies for building resilience and dealing with self-doubt and developing our confidence. The workshop will highlight the emotional intelligence competencies needed for success in research and healthcare careers and will provide insights into approaches for developing these competencies as part of your NIH experience.

PLANNING FOR CAREER SATISFACTION & SUCCESS
Understand how your personal interests, skills, and values can contribute to your future career success. Topics to be covered include the importance of career decision making, learning styles, self-assessment, transferrable skills, defining success, personal needs, work/life balance, cultivating strong mentor relationships, and articulating short-term and long-term goals.

JOB SEARCH STRATEGIES
A job search involves more than just applying to job postings. Successful job searches require planning and four key elements: building a productive network, creating resumes that work for you, establishing search strategies for finding jobs, and preparing for a competitive interview. This session examines the job search as a process that integrates those four key elements.

WHAT CAN YOU DO IN COLLEGE TO ENHANCE YOUR CHANCES OF GETTING INTO MEDICAL OR GRADUATE SCHOOL?
If you are heading back to school soon, you may be asking yourself how to use that time wisely. What should you do during the rest of your high school career and those 4 years of college to make yourself competitive for medical (or dental) school or graduate school?

ETHICS IN RESEARCH FOR SUMMER INTERNS
This year the OITE will offer a two-hour workshop on the Responsible Conduct of Science on the main campus in Bethesda for summer interns. The workshop will address issues including

- a general overview of research misconduct and its far-reaching effects,
- the use of animals in research,
- human subjects research,
- data management and analysis,
- plagiarism,
- collaboration ethics,
- ethics of publication,
- interpersonal relationships, and
- the processes for dealing with and reporting misconduct.

CAREER DEVELOPMENT SERIES FOR HIGH SCHOOL STUDENTS
This year we are repeating our series of workshops for summer interns who are in high school. The goal is to help you develop skills that will serve you well regardless of what career you ultimately decide to pursue. The four workshops in the series are:

- Self-awareness and Relationships with Others
- Career Exploration
- Success in College
- Professional Communication

Interns who attend all four will be eligible to receive a certificate of completion. For more information, see https://www.training.nih.gov/nih_career_development_activities/resources_for_high_school_students.
Summer Poster Day is a great opportunity to share your work from the summer while developing your communication and networking skills. Any student (high school, college, medical, dental, or graduate) working in an intramural research group as a summer intern may present. You may not have final results from your experiments. However, you can still share background information on your project, any data you may have collected, or a discussion of the technical problems you encountered. During the session you will spend a period of time at your poster discussing your project informally with your peers and other members of the NIH scientific community.

REGISTRATION

Summer Poster Day 2018 is scheduled for Thursday, August 9th and will be held in Natcher Conference Center (Building 45). If you want to participate in Summer Poster Day you must sign up in advance. You can sign up to present a poster at https://www.training.nih.gov beginning June 5th. The deadline to sign up is Tuesday, July 10th, at 5:00 pm (EDT).

Discuss your registration with your supervisor(s), who are called Preceptors in the Summer Poster Day Program, BEFORE you attempt to register. Make certain you agree on the exact title of your poster, as well as the names and correct titles of all authors. You should also discuss the order of authors. Remember the Presenter(s), who are summer interns, will be listed before the Preceptors. You can select only one IC, which should be the IC in which the work was done. The information you submit on your registration will appear in the program, so be certain to reach agreement on the submission in advance and check your work carefully.

Your registration for Poster Day 2018 will be confirmed via email by July 20th. At that time you will receive information on your poster board assignment (board number, session, and time) as well as instructions for putting up your poster.

CREATING AND PRINTING YOUR POSTER

You will be assigned a board 3 1/2 feet high and 3 1/2 feet wide on which to display your information. Your poster should not exceed this size! Your poster should include an introduction (providing background information), a brief statement of the purpose of the project, a description of materials and methods used, results, and conclusions.

Begin writing and proof-reading your poster several weeks in advance. Also, develop and practice a short (5-10 minutes) verbal description of the work that you can present to colleagues who visit your poster. You have several options for printing your poster; in all cases make arrangements well in advance.

- See if your Institute or Center has a poster printer that you can use.
- You can also make an appointment with the Information Technology Center to print your poster. Do this early! The Center and its programs are described at http://www.cc.nih.gov/dcri/itc.html. The Center is located in Building 10, Room B1S235. The phone number is 301.402.6301.
- The NIH Medical Arts Branch (MAB) (https://www.ors.od.nih.gov/mab/Work/Pages/poster-printing.aspx) prints posters for a fee, billable to your research group via a CAN. Make certain in advance that your research group is willing to cover the cost. Reduced-scale poster proofs – highly recommended – can also be purchased. Standard turn-around is 2-3 business days with a proof, or 1-2 business days without a proof. Posters are printed on a first-come, first-served basis. Medical Arts is located in Building 10, Room B2L 103. Orders may be placed in person, by phone (301.496.3221), or online at https://orderonline.medarts.nih.gov/category_sc. Please provide your file, final size, due date, a CAN and an Administrative Officer (AO) name when you place your order.
POSTER LAYOUT

An example of how to lay out your poster is provided below. Here are some other general guidelines:

• A light background with dark text is often easier to read.
• Use one font and style to integrate all portions of your poster.
• Make sure the poster is readable from at least 4 to 6 feet away.
• Label graphics directly and use tables for small data sets.
• Keep your title simple and state the conclusion or focus of your study.
• Figures, diagrams, and bullet points are better than paragraphs of text.

A general rule of thumb is to allow 40% of your space for graphics and 20% for text, leaving the remaining 40% as white space.

If you are still uncertain what scientists mean when they talk about presenting a poster, attend the workshop entitled “Creating and Presenting Dynamic Posters” and drop by the Poster Preview to look at several posters recently presented by trainees at the NIH.

Summer Poster Day 2018!
NIH SECURITY

The National Institutes of Health is the Federal focal point for biomedical research in the United States. The main campus in Bethesda, MD is surrounded by a perimeter fence designed to keep the campus safe and secure.

Individuals wishing to enter must either present an NIH ID badge or be checked in each day as Visitors. The NIH requires a security investigation on all summer students prior to issuance of their NIH ID badges. The Division of Personnel Security and Access Control (DPSAC) is the principal component within NIH responsible for managing access onto campus.

WHAT YOU CAN DO BEFORE ARRIVING AT THE NIH

All summer interns at the NIH will require a fingerprint check against the FBI database to receive an NIH Restricted Local Access (RLA) ID Badge. You can get this process started before coming to the NIH by requesting that your Summer Coordinator enter your information into NED, the NIH Enterprise Directory. The system will generate a request that you enter your own Personally Identifiable Information (PII) into NED.

If you do not enter your information into NED, you will be required to fill out a PIV Badge Request Form (HHS-745), which the Summer Coordinator for your Institute will provide you, and turn the form in to Building 31, Room 1B03. However, not taking care of entering your information into NED before you arrive will significantly increase the time it takes to get your NIH ID badge and computer access, so we recommend that you take care of this in advance.

Note: Summer students under the age of 18 must also provide parental / legal guardian consent to undergo the necessary security screening. Parental / legal guardian consent is not available using the secure NED portal. These students must complete a paper copy of the HHS 745.

IMPORTANT NOTE: the parent/legal guardian’s signature on the FORM HHS 745 must be notarized.

If you submitted your Badge Request Form in a timely fashion and have been entered into NED by your Institute, you will receive an email with instructions on how to make an appointment to be fingerprinted and photographed for your badge. For more information about the fingerprint process please visit: http://www.ors.od.nih.gov/ser/dpsac/badge/Pages/students.aspx.

You will need to bring 2 Forms of acceptable identification to the fingerprinting appointment such as a:

- Driver’s license
- Social security card
- Passport
- Birth certificate
- School ID card with a photograph

All documents must be unexpired, and one must be a photo ID. For a full list of acceptable identification documents see: http://www.ors.od.nih.gov/ser/dpsac/Documents/Table.pdf

The fingerprint results will be sent to the NIH within one to two days. DPSAC will receive the fingerprint results from Office of Personnel Management (OPM) and update your record. Individuals with a successful fingerprint check will then be notified via email that they have been authorized for an RLA ID badge. The email will contain instructions on how to schedule an appointment to pick up the badge. For a view of the step-by-step process see: http://www.ors.od.nih.gov/ser/dpsac/badge/Documents/Summer Student Flow - 2016.pdf.

In summary, you can receive your badge as soon as (1) your contact information has been entered in NED and (2) the fingerprint check has been successfully completed. Your ID badge will be valid for the duration of the summer and should be turned in when you leave NIH.
SUMMER STUDENTS AT REMOTE LOCATIONS

Summer interns who will be reporting to remote NIH locations outside of Bethesda, like Rocky Mountain Laboratories (RML), NIEHS-Research Triangle Park (RTP), or Frederick, will receive fingerprint checks administered by appropriate local security staff. DPSAC will review the results of the fingerprint check and notify the students when they have been authorized for a RLA ID Badge. These remote locations will have local badging stations. Summer interns working at these locations should contact their local security office for information on where to obtain an RLA ID Badge and/or schedule an appointment. For contact information on all campuses see: http://www.ors.od.nih.gov/ser/dpsac/Pages/contactinfo.aspx.

YOUR NIH ID BADGE AND EMAIL ACCOUNT

For your convenience, the NIH will issue you an ID badge and, perhaps, an NIH email account. You should use them only in your official dealings with the NIH. IMPORTANT NOTE: Do not use your NIH email account outside the NIH or in social (or social media) situations. It is extremely important that you not give the impression that you speak for or represent the NIH.

PREPLACEMENT MEDICAL EVALUATION

WHO NEEDS A PREPLACEMENT MEDICAL EVALUATION?

Summer trainees are required to complete a preplacement medical evaluation before beginning laboratory work ONLY if they will be working

- in Building 10 (all areas),
- with human blood, body fluids, or tissues,
- with human pathogens (infectious agents),
- with patients, (i.e., have any patient contact or work in patient care areas)
- with hazardous chemicals, (select carcinogens, reproductive toxins, or acutely toxic chemicals) or
- with animals (specifically, live vertebrates).

If one of these conditions applies to you, you should receive the evaluation prior to starting work or no later than two weeks after your start date. The OMS hopes to complete all these evaluations before July 1st.

HOW IS A MEDICAL EVALUATION ARRANGED?

Preplacement medical evaluations are provided by the Occupational Medical Service (OMS). OMS is also where you go if you have a work-related health emergency while at the NIH.

There is no charge for this visit. You should schedule your appointment within two weeks of your start date.

The appointment will take approximately 20 minutes. OMS has tailored the evaluations to meet interns’ individual needs as well as the requirements of the NIH. Please take the following steps to expedite your evaluation:

- Have your personal health care provider (HCP) complete a Documentation of Immunization form (this will help prevent your receiving an unnecessary immunization);
- If you cannot document your response to a tuberculin skin test within the past twelve months, have your HCP place and read a tuberculin skin test prior to your appointment in OMS (this will eliminate a second visit to OMS);
- If you are not yet 18 years old, have your parent or guardian complete the Authorization for Treatment of a Minor form;
- Please submit the required forms to OMS, either in person to Building 10, Room 6C306, by fax (301.402.0673), or by email: oms@mail.nih.gov.

Once OMS has received your completed forms, they will contact you to schedule the preplacement medical evaluation. It is very important that you provide OMS with the best way to contact you.

If you will work with nonhuman primates, or be in their presence, please mention this to OMS prior to your preplacement medical evaluation, as they may need to conduct additional tests. Any minor who arrives at OMS without the Authorization for Treatment of a Minor form will not be seen.

LIMITATIONS ON THE ACTIVITIES OF MINORS

If you are under eighteen years of age at the time that you participate in the Summer Internship Program, you will be considered a minor, and the activities in which you can participate will be restricted. The following limitations will apply.

Minors may not work with

- radioactive isotopes;
- nonhuman primates;
- select agents (for example, Ebola and anthrax);
- human and nonhuman primate blood, body fluids, or tissues;
- human and nonhuman primate retroviruses; or
- select carcinogens, reproductive toxins, and acutely toxic chemicals as outlined in the NIH Chemical Hygiene Plan.

In addition, minors may not work in laboratories designated Biosafety Level 3 or Biosafety Level 4.
SUPERVISION OF STUDENTS IN LABORATORIES

It is the responsibility of your principal investigator to ensure your safety at the NIH. You can assist in this endeavor by making certain that the following principles are applied:

- You must be directly supervised at any time you are working with potentially hazardous materials.
- You must be appointed under a hiring authority (as an IRTA/CRTA or FTE) or as a Special Volunteer so that proper insurance coverage applies.
- If you are a minor, your parents should sign a consent form that correctly describes your activities, to permit you to work in the lab.
- You must complete laboratory safety training.

TRANSPORTATION TO THE NIH AND PARKING

Summer Coordinators will be furnished with one-day parking passes for your first day. This one-day dashboard permit (only available between May 1 and June 30) will authorize you to park in Multi Level Parking 11, which is located on Rockville Pike at Gateway Drive. After you park, proceed to the Gateway Center (Building 66) to get a Visitor's badge. At the end of the day you will be required to surrender the one-day permit to the attendant at the parking booth.

Once you have been entered into NED (see above) and you have a NED ID number, you may apply for Transhare. You are encouraged to apply for Transhare soon after you arrive to the NIH campus by going to the NIH Parking Office (see below).

You can commute to the NIH in several ways:

TRANSshare

The NIH Transhare Program provides commuter subsidies to qualified individuals who use mass transit to and from work. Summer interns, volunteers, and fellows are eligible. Subsidies are issued in the form of a SmartTrip card – similar to a credit card with a magnetized strip – that is used for transit payments. This subsidy is valid on Metro, local DC area buses, MARC/VRE trains, commuter buses, and vanpools.

Individuals who live in the National Capital Region and agree to use mass transportation for commuting between home and the work place are eligible for a transit subsidy. Complete information on the program can be found at http://www.ors.od.nih.gov/pes/dats/Transhare/Pages/transhare.aspx.

To apply for the NIH Transhare Program, you must fill out an NIH Transhare Program Application form in the NIH Parking Office (Building 31, Room 1A11). The form has a commuting cost declaration process to assist you in calculating your monthly Transhare benefit, which is based on the distance you travel. Misrepresentation of your cost declaration could lead to criminal, civil, and/or administrative penalties. To ensure correct cost declaration, the Division of Amenities and Transportation Services uses the WMATA (Metro) Trip Planner found at http://wmata.com/index.cfm.

Transhare subsidies will be available for the length of your internship.

The following links provide more detailed information on public transportation in the NIH area:

- Parking Office
  - Hours: 8:00 am – 4:00 pm, Monday through Friday
  - Location: Building 31/Room 1A11
  - Phone number: 301.496.5050
  - Email: nihparkingoffice@ors.od.nih.gov
- NIH Transportation website: http://www.ors.od.nih.gov/pes/dats/Pages/index.aspx
- Montrose Park and Ride Lot, Montrose Road and Hoya Street, North Bethesda, MD: http://www.ors.od.nih.gov/pes/dats/parking/Pages/montrose.aspx
- Metro Bus and Rail: http://www.wmata.com
- Employee Travel: Trains, MARC (Maryland Rail Commuter Service) and VRE (Virginia Rail Express): http://www.commuterpage.com/rail.htm
- MetroAccess, curb-to-curb service for those unable to use public transportation: http://www.wmata.com/service/accessibility/metro-access/index.cfm
- Maryland Transit Authority, subway, bus, and train systems in Maryland: https://www.wmata.com

PARKING AT MONTROSE PARK AND RIDE LOT

Students may apply for Parking Permits at the NIH Parking Office located in Building 31/Room 1A11. The temporary “Summer Parking Permit” is a dashboard placard for satellite parking. Students must present their NIH ID and vehicle registration to obtain a permit. NIH Satellite Parking (Montrose Park and Ride Lot) is located at Montrose Road and Hoya Street. To view a map detailing the satellite parking location visit: http://www.ors.od.nih.gov/pes/dats/parking/Pages/montrose.aspx. The designated area is marked with signage by Montgomery County, “North Bethesda Permits Only”, but Montgomery County will recognize and honor the NIH Parking Permits. Arrive early as having a parking permit does not guarantee you a spot. NIH runs a shuttle service loop between this location and the campus. Information on the schedule and route...
of the Montrose Park and Ride Lot (Yellow Line) Shuttle can be found at http://www.ors.od.nih.gov/pes/dats/nihshuttleservices/Pages/shuttle.aspx. Summer students who are handicapped and have handicap tags/hangers may park in any handicapped space on the campus that is not reserved for a specific NIH handicapped employee. Anyone who has handicap tags/hangers may also park at any metered space without paying.

Note: Summer interns are not permitted to park on the main NIH campus. Those working at satellite locations may have access to parking at those locations. Ask your summer program coordinator.

**BICYCLING**

Those interested in bicycling to the NIH may find some links of interest here: http://www.ors.od.nih.gov/pes/dats/nihbicycleprogram/Pages/default.aspx. NIH Bicyclists can now transport their bicycles on three (3) of the NIH shuttles. We are ecstatic to announce that Campus Shuttles #32, #41 and Montrose Shuttle #34 are equipped with the same bike racks as the Metro buses. For instructions on how to use the bike racks visit WMATA: https://www.wmata.com/service/bikes/.

**SHUTTLES**

The NIH runs several shuttle lines. All summer students can ride any NIH employee shuttle. Shuttles are available Monday through Friday, except Federal holidays. Some circle the Bethesda campus at regular intervals, while others connect the Bethesda campus with nearby NIH laboratories and offices such as those on Executive Boulevard and at Rockledge. You can find shuttle routes and schedules at http://www.ors.od.nih.gov/pes/dats/nihshuttleservices/Pages/shuttle.aspx. Information on the NCI-Frederick Shuttle is posted at http://ncifrederick.cancer.gov/Staff/Shuttle.aspx.

Note: Real time updates on shuttle arrivals are now available: http://wttsshuttle.com.

**IMPORTANT PAPERWORK**

Six to ten years from now you might be applying for hospital privileges or a government job, or a position that requires a security clearance. Keep a copy of your IRTA/CRTA or other award letter in a safe place for when that day comes. The OITE does not keep records of who has been a trainee at the NIH.

Also, before you leave, make sure the Office of Financial Management has your current address so they can forward tax information.

**PAYING TAXES ON YOUR SUMMER INCOME**

Summer interns are generally appointed in one of two ways, as Student IRTAs/CRTAs (recipients of Intramural Research Training Awards; Cancer Research Training Awards in the NCI) or FTEs (Full-Time Equivalents or employees).

If you are paid as a Student IRTA/CRTA,

- you are considered a trainee, not an employee,
- social security taxes are not deducted from your stipend,
- no income taxes are withheld from your stipend,
- your “income” is reported on a Form 1099G as a **taxable grant**,
- if you earned enough during the year to be liable for income taxes, you must report the income shown on your 1099G on Form 1040 on line 21, “other income,”
- you should not indicate that you are self-employed or file a Schedule C.

If you are appointed as an FTE,

- you are considered an NIH employee,
- social security taxes are deducted and income taxes are withheld from your stipend,
- your income is reported on a Form W2 as **wages, tips, and other compensation**,
- if you earned enough during the year to be liable for income taxes, or if you are due a refund, you should report the income shown on your W2 on line 7 of Form 1040 or the equivalent line on Form 1040EZ or 1040A.

You should receive your Form 1099G or W2 by February 15. If you do not, or if your address has changed, contact the NIH Office of Financial Management at 301.496.5635.

If you are paid by the NIH via some other mechanism or by another agency, please contact the Administrative Officer at the NIH responsible for your laboratory or the responsible administrator at the agency for tax information. It would be best to do this before you leave the NIH at the end of the summer.

Remember, whoever pays you sends a copy of your Form 1099G or W2 to the Internal Revenue Service. If you have a tax liability, you must file a Federal Income Tax Return. If the government owes you money, it’s in your own best interest to file.
LABORATORY SAFETY
The NIH is responsible for the promotion of safe work practices for all who work in NIH research facilities, including summer students. The Division of Occupational Health and Safety offers several required laboratory safety courses that summer research trainees must complete within 30 days of beginning to work in a laboratory. The courses listed below provide training in the safe work practices and procedures to be employed when working in the NIH research environment. Laboratory supervisors are responsible for ensuring that their staff members attend the correct training prior to working with potentially hazardous materials. Note: Students will be allowed to complete laboratory safety training before they have received their NIH ID badges.

INTRODUCTION TO LABORATORY SAFETY
The introductory course in laboratory safety is mandatory for all new laboratory research trainees. It must be completed prior to attending any other courses or working in an NIH lab. The course introduces laboratory personnel to common hazards and exposure risks, including chemical, radiological, and biological hazards that are found in NIH research laboratories. It provides instruction on how to prevent exposure to these hazards and procedures for emergency response. The course also covers NIH waste-handling procedures as well as methods to ensure the research laboratory is free from common physical hazards. It provides information on NIH security policies and procedures. To access the online course, go to https://www.safetytraining.nih.gov. This course can be accessed from any computer, private or NIH owned.

STARS “LEARN-BY-DOING” LABORATORY SAFETY TRAINING
https://www.safetytraining.nih.gov/#61
After completing the computer-based Introduction to Laboratory Safety, trainees age 21 or under who are new to the NIH, must attend a hands-on course in laboratory safety entitled “Learn-by-doing.”

“Learn-by-doing” is taught by occupational safety and health professionals who have practical working laboratory experience. A broad range of laboratory safety topics will be covered including, but not limited to: the principles of biosafety; chemical handling and use; common laboratory hazards; and emergency preparedness. The learning objectives will be met through active dialogue between students and instructors. Students will work in small groups with an instructor to practice and learn laboratory safety techniques as well as the rules of safe conduct. Students and instructors will problem solve and think critically together through a series of learning exercises.

To demonstrate comprehension of the material, students must complete a quiz. The minimum passing grade is 85 percent. If necessary, additional one-on-one instruction will be provided to ensure successful course completion.

STARS “Learn-by-doing” Laboratory Safety Training will be offered either from 8:30 am to 12:00 pm or 1:00 to 4:30 pm from the end of May until the end of July. STARS Training is a summer program only. Designed for individuals 21 years old and younger, it is a substitute for NIH Laboratory Safety Training 101.

To see available dates and to register, visit https://www.safetytraining.nih.gov.

NIH LABORATORY SAFETY TRAINING 101
After completing the computer-based Introduction to Laboratory Safety, new summer trainees over the age of 21 are required to complete a second online course entitled NIH Laboratory Safety Training 101. This course
provides training on the recognition and control of common physical, chemical, and biological hazards found in NIH research laboratories. It includes required information on NIH policies and procedures for working safely in the research laboratory as well as methods for hazardous waste minimization. The course also covers engineering controls and personal protective equipment as well as the NIH medical surveillance program available through the Division of Occupational Health and Safety, Occupational Medical Service. Completion of this course assists in meeting the training requirement of the OSHA Hazard Communication Standard and Occupational Exposure to Hazardous Chemicals in Laboratories Standard.

**LABORATORY SAFETY REFRESHER COURSE (ONLINE TRAINING COURSE)**

All returning summer interns must complete a one-hour mandatory computer-based Laboratory Safety Refresher Course that provides updates on safety procedures and policies that govern laboratory safety at the NIH. The refresher course should be completed online at: [https://www.safetytraining.nih.gov](https://www.safetytraining.nih.gov).

Registration for all Division of Occupational Health and Safety Training can be completed at the same site.

**BLOODBORNE PATHOGEN TRAINING**

**WORKING SAFELY WITH HIV AND OTHER BLOODBORNE PATHOGENS FOR NON-HOSPITAL PERSONNEL**

This two-hour course is for all individuals working with bloodborne pathogens. This training must be completed by all trainees/employees before working with human blood, body fluids, and/or tissues; human or nonhuman primate retroviruses; hepatitis B and C viruses; or other bloodborne pathogens. The course provides research personnel with information on working safely with bloodborne pathogens in NIH research laboratories in accordance with the OSHA Bloodborne Pathogen Standard. This course specifically discusses work practices in Biosafety Safety Level 2 and 3 laboratories, common causes of exposure, and the use of controls to prevent exposure. The course outlines steps to take in case of a potential exposure and reviews medical pathological waste disposal procedures. Attendance at this program is mandatory for research personnel who work with or who may be exposed to:

- human blood, body fluids, and/or tissues;
- human or nonhuman primate retroviruses;
- hepatitis B and C viruses;
- other bloodborne pathogens;
- animals or their housing.

* STARS: Safe Techniques Advance Research Science
** as applicable
Working Safely with HIV and Other Bloodborne Pathogens will be offered several times a month during the summer. For the course schedule and to register, please see https://www.safetytraining.nih.gov.

Please note: Credit for attendance will not be given to late arrivals. Individuals who are late will be asked to reschedule.

**Bloodborne Pathogen Refresher Training**
This Web course provides annual refresher training for research laboratory personnel who may potentially be exposed to bloodborne pathogens during their work in the research laboratory and have previously attended Working Safely with HIV and Other Bloodborne Pathogens. The course provides researchers with the latest information on bloodborne pathogen risks in the research laboratory as well as information on means of protection from potential occupational exposures. Summer researchers who have completed the Working Safely with HIV and Other Bloodborne Pathogens course within the last three years can complete the refresher course instead of attending a classroom bloodborne pathogen course. Annual completion of a Bloodborne pathogen course is mandatory for all laboratory research personnel who work with or who may potentially be exposed to bloodborne pathogens.

To register for any Division of Occupational Health and Safety course, please use the online registration program available at https://www.safetytraining.nih.gov. This can be accomplished from ANY computer, private or NIH owned.

**Radiation Safety**
We do not mandate that all summer students or trainees 18 years of age or older entering labs posted for radioactive material take the Radiation Safety Orientation (RSOR) online module http://drsportal.ors.od.nih.gov/pls/onlinecourse/training/start_orientation.html, we simply recommend it for general awareness purposes. It is up to the posted lab’s Authorized User (AU), usually the PI, to ensure that anyone entering the lab is properly trained (which could mean many things, depending on what that person is actually doing in the posted lab). Note that minors less than 16 years of age are prohibited entirely from working with radioactive material. Those who are 16 years or older, but less than 18, can work with radioactive material ONLY AFTER receiving special permission from the NIH Radiation Safety Officer (RSO) via the RSO’s signature on the application form (see requirements at http://drs.ors.od.nih.gov/training/Pages/minor.aspx). Minors between the ages of 16 and 18, who are simply working in a posted lab (and not working with or using radioactive material) should be trained. However, again, while we recommend they take the RSOR, it is up to the lab’s AU/PI to require that training.

Anyone (including all Summer Interns) planning to handle radioactive materials must (1) register with Division of Radiation Safety (DRS) http://drsportal.ors.od.nih.gov/pls/onlinecourse/training/start_registration.html, (2) complete a dosimeter evaluation form (DEF), http://drsportal.ors.od.nih.gov/pls/onlinecourse/training/dosimetry_form.html, and (3) take the Radiation Safety in the Laboratory (RSL) course, prior to beginning research.

You can call 301.496.2255 to register for the RSL class or do so online at http://drsportal.ors.od.nih.gov/pls/onlinecourse/training/start_registration.html. If you are a returning summer student, you do not need to repeat this course, as long as you have taken it within the last four years. You do, however, need to call 301.496.2255 to be reactivated in the Radiation Safety database (assuming you were inactivated when you left) and complete a revised DEF. The Division of Radiation Safety can also provide you with your DRS number at that time upon request. Individuals who have been away from the NIH for more than four years must retake the RSL course.

2017 RSL courses will be held online and can usually be completed in less than four hours.

Optional “Practical Exercise” training is now available
• Spill response and recovery drills are provided to help Users gain experience in the event that radioactive contamination escapes a working boundary.
• Drills are scenario-based and are tailored to the working environment of the student.
• Practical exercise training is required if a User plans to participate in activities covered under a DRS protocol.
• This additional training is required for minors ages 16 and 17.

You will need to use a computer that has access to the NIH network to take the Radiation Safety courses and view the DRS website.
ANIMAL CARE AND USE
The Office of Animal Care and Use (OACU) offers a variety of training courses for NIH intramural personnel who work with animals. These courses are free and fulfill Federal training requirements for working with animals. Depending on what species you will be working with, different courses are required. You may register online at https://oacu.oir.nih.gov/training-resources or by calling the OACU at 301.496.5424.

USING ANIMALS IN INTRAMURAL RESEARCH: GUIDELINES FOR ANIMAL USERS
Students who will be working with animals under the direction of a senior scientist must complete Guidelines for Animal Users before beginning their work. The course is offered in an online, Web-based format. It describes proper care and use of animals in a research laboratory. Additional discussion of animal handling, restraint, and breeding is presented to assure humane management of the animals.

The online course takes approximately 90 minutes to complete but does not have to be finished in one sitting. To access the online course, go to https://oacutraining.od.nih.gov.

WORKING SAFELY WITH NONHUMAN PRIMATES
This course is required for all trainees who will be working with nonhuman primates (NHP). You will learn about the normal behavior of NHP to help prevent injury and exposure to pathogens, such as Herpes B-virus, that are transmissible to humans. The course, which consists of a video, handouts, and a quiz, is given on an individual basis at the animal facility. Further information on this course can be obtained from your Institute/Center Animal Program: https://oacu.oir.nih.gov/sites/default/files/uploads/information-for-scientists/ic_contact.pdf.

HANDS-ON ANIMAL TECHNIQUES: RODENT WORKSHOPS
The Rodent Workshops are optional opportunities to learn manual handling, sampling, and restraint techniques used in the laboratory with live animals. These half-day, small-group sessions provide an opportunity for individual instruction by certified laboratory animal technologists.

Hands-on Mouse Workshops are offered during the summer. See https://oacutraining.od.nih.gov to register. You can start registering six weeks in advance, but note that the registration closes two weeks before the scheduled date of each workshop. Hands-on Rat Workshops may be offered upon request.

OPTIONAL RESEARCH ETHICS COURSES
As scientists, our work is based and depends heavily on the work of those who came before us. It is absolutely essential that they conducted and reported their research responsibly, and we have a similar responsibility to those who will follow. To learn about what constitutes the responsible conduct of research and what ethical issues are of concern to investigators, take a look at the Ethics and Scientific Research Study Guide developed by NCI investigators at NCI-Frederick. The guide can be found at https://training.ncifcrf.gov/Classroom/Default.aspx?CourseId=12. See also Ethics in Research for Summer Interns on p. 16.
AFTER YOUR INTERNSHIP: COMING BACK TO THE NIH

NIH PROGRAMS FOR UNDERGRADUATES AND RECENT COLLEGE GRADUATES

THE NIH UNDERGRADUATE SCHOLARSHIP PROGRAM (UGSP)
The NIH Undergraduate Scholarship Program (UGSP) offers scholarship awards to undergraduate students from disadvantaged backgrounds who are committed to careers in biomedical, behavioral, and/or social science health-related research. The financial benefits of up to $20,000 per year can be used to cover tuition, plus reasonable educational and living expenses. There are NIH service obligations during the summer and after graduation.

For more details regarding eligibility and to apply, visit the UGSP website, https://www.training.nih.gov/programs/ugsp. To request additional information, email ugsp@nih.gov.

POSTBACCAULAUREATE INTRAMURAL RESEARCH TRAINING AWARD (IRTA)
The Postbaccalaureate Intramural Research Training Award (IRTA) is a program for U.S. citizens or permanent residents who have (1) been awarded a bachelor’s degree no more than 3 years prior to the activation date of the Traineeship or (2) completed a master’s degree less than 6 months prior to the activation date of the Traineeship and who intend to apply to graduate school in a biomedical program or to professional (medical, dental, pharmacy, etc.) school during their tenure at the NIH or (3) students who have been accepted into graduate or professional school as outlined above and have written permission from their school to delay entrance for up to 1 year. The program includes more than 1200 students.

The program features:
- the option of applying to the NIH Academy Fellows and Certificate programs ([https://www.training.nih.gov/new_nih_academy_home](https://www.training.nih.gov/new_nih_academy_home)), which focus on health disparities,
- a Postbac Committee that plans social and community service activities,
- a monthly seminar series: three postbacs present their work in each session,
- workshops on applying to and interviewing for graduate or medical school, public speaking, presenting a poster, preparing for the GRE or MCAT, etc.,
- Postbac Poster Day in spring,
- the Graduate & Professional School Fair in summer,
- an official listserv (OITE-POSTBACS), and
- community service activities.

For more information visit [https://www.training.nih.gov/programs/postbac_imta](https://www.training.nih.gov/programs/postbac_imta).

THE GRADUATE PARTNERSHIPS PROGRAM

The Graduate Partnerships Program (GPP) links the National Institutes of Health (NIH) to national and international universities in the training of graduate students. Participants get the best of both worlds – the academic environment of a university and the breadth and depth of research at the NIH. This different kind of graduate experience focuses on training the next generation of scientific leaders by accelerating communication and collaboration skills. Over 400 graduate students, representing more than 100 universities worldwide, work and study at the NIH.

Graduate students come to the NIH in one of two ways: 1) If you have an undergraduate degree and you would like to pursue a PhD in the biomedical sciences you can apply to one or more of the GPP Institutional Partnerships. Students apply concurrently to the GPP and to a partner university. Enrollment is limited to U.S. citizens and U.S. permanent residents. 2) If you are currently enrolled in a PhD program and you would like to perform part or all of your dissertation research at the NIH, consider developing an individual agreement between an NIH investigator and your graduate university. Individual agreements are open to U.S. Citizens, U.S. permanent residents, and foreign nationals currently enrolled in a PhD or equivalent program.

All graduate students at the NIH are part of the GPP and can take advantage of the graduate student community and career and professional development services supported by the Office of Intramural Training & Education (OITE). For more information, visit [https://www.training.nih.gov/programs/gpp](https://www.training.nih.gov/programs/gpp).
PROGRAMS FOR MEDICAL, DENTAL, AND VETERINARY STUDENTS

THE NIH MEDICAL RESEARCH SCHOLARS PROGRAM (MRSP)
The NIH Medical Research Scholars Program (MRSP) is a comprehensive, year-long research enrichment program designed to attract the most creative, research-oriented medical, dental, and veterinary students to the intramural campus of the NIH in Bethesda, MD. Scholars engage in a mentored basic, clinical, or translational research project in an area that matches their professional interests and career goals. This program blends the elements of two former, highly successful programs on the NIH campus—the Howard Hughes Medical Institute-NIH Research Scholars Program and the NIH Clinical Research Training Program. MRSP Scholars witness, participate in, and collaborate on rigorous, hands-on research, with offerings across the full continuum of biomedical research—the bench, the bedside, and in between—including computational biology, medical informatics, and other emerging areas of contemporary science. Scholars augment their research experiences through journal clubs with peers and a lecture series to learn more about the scientific discovery process, as well as science policy, issues in bioethics, and emerging technologies. For more information about the MRSP, see https://www.cc.nih.gov/training/mrsp/index.html.

THE NIH CLINICAL ELECTIVES PROGRAM (CEP)
The NIH Clinical Electives Program (CEP) provides opportunities for allopathic or osteopathic medical students and dental students to care for patients and explore clinical investigation during short term elective rotations in more than 30 subspecialty areas. CEP is open to senior level students or MD-DO/PhD students in good academic standing who have completed (or are in the process of completing) their core clerkships in medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery. Most elective rotations in the specialty areas are offered for periods of four to twelve weeks, beginning usually on the first Monday of each month. Participants learn about the design and conduct of natural disease history studies, phase 1 or 2 clinical trials, and fundamental principles of translational medicine while evaluating or treating patients who are enrolled in investigational protocols in the clinics or on the wards of the NIH Clinical Center, the world’s largest hospital devoted to human subject research. For more information, see https://www.cc.nih.gov/training/students/clinical_electives.html.

ENTERTAINMENT

While most of your time this summer will be occupied with research, a summer in the Washington, DC area would not be complete without experiencing the sights of the city. The national capital is well known for its role as the seat of the U.S. government, but it also has much to offer in the way of culture, history, and entertainment. Whether you are looking for art, music, nightlife, good food, or natural beauty, choices in the DC metro area abound. The museums, parks, and historical sites listed here are just a sampling of the interesting places and events you can find around town. The following online guides are also useful:

SMITHSONIAN

Smithsonian • American Art Museum
8th & F Streets NW
Washington, DC 20001
202.633.7970 or 202.633.1000
http://www.americanart.si.edu
Admission: Free
Metro: Green/Red/Yellow Lines, Gallery Place/Chinatown
Comments: In the same building as the Portrait Gallery; the two are linked by a covered courtyard.

Smithsonian • Anacostia Community Museum
1901 Fort Place SE
Washington, DC 20020
202.633.4820
http://www.anacostia.si.edu
Admission: Free
Metro: Green Line, Anacostia, then W2 or W3 bus
Comments: Has one of the city’s finest collections of African-American art.

Smithsonian • Arthur M. Sackler Gallery
1050 Independence Avenue SW
Washington, DC 20013
202.633.1000
http://www.freersackler.si.edu
Admission: Free
Metro: Blue/Orange Lines, Smithsonian
Comments: Specializes in Asian art; now linked to the Freer Gallery of Art.

Smithsonian • Arts & Industries Building
900 Jefferson Drive SW
Washington, DC 20013
202.633.1000
https://www.si.edu/SpecialEvents/ArtsandIndustries
Metro: Blue/Orange Lines, Smithsonian
Comments: After being renovated in 2016, this second oldest of the Smithsonian buildings reopened as an exclusively special-events venue.

Smithsonian • Freer Gallery of Art
12th Street & Jefferson Drive SW
Washington, DC 20013
202.633.1000
http://www.freersackler.si.edu
Admission: Free; Metro: Blue/Orange Lines, Smithsonian
The Freer Gallery is currently closed for renovations.
Comments: This building, physically connected to the Sackler Gallery, specializes in Japanese artifacts.

Smithsonian • Hirshhorn Museum & Sculpture Garden
7th Street & Independence Avenue SW
Washington, DC 20013
202.633.4674
http://www.hirshhorn.si.edu
Admission: Free; Metro: Blue/Orange Lines, Smithsonian
Comments: An impressive collection of sculpture, classic, and modern, plus contemporary art.
Smithsonian • National Air & Space Museum
6th Street & Independence Avenue SW
Washington, DC 20560
202.633.2214
http://www.nasm.si.edu
Admission: Free
Metro: Blue/Orange Lines, Smithsonian
Comments: Spaceships and aircraft
plus an IMAX Theater.

Smithsonian • National Air & Space Museum,
Udvar-Hazy Center
Steven F. Udvar-Hazy Center
14390 Air & Space Museum Parkway,
Chantilly, VA, 20161
703.572.4118
http://www.nasm.si.edu/udvarhazy
Admission: Free, but a parking fee is charged
Comments: Located near Dulles Airport in the Virginia
countryside. Contains, among hundreds of actual
aircraft, the space shuttle Enterprise, the Condorde,
the Enola Gay, and the Lockheed SR-71 Blackbird.

Smithsonian • National Museum of African
American History and Culture
14th St and Constitution Ave NW
Washington, DC 20001
202.633.1000
http://www.nmaahc.si.edu
Admission: Free; Metro: Blue/Orange Lines, Smithsonian
Comments: This is an incredibly popular museum. Check
online to see about getting tickets in advance and how
to obtain same-day tickets.
https://nmaahc.si.edu/top-10-things-grand-opening

Smithsonian • National Museum of African Art
950 Independence Avenue SW
Washington, DC 20560
202.633.4600
http://www.nmafa.si.edu
Admission: Free
Metro: Blue/Orange Lines, Smithsonian
Comments: Ancient African Art to
20th century artifacts.

Smithsonian • National Museum of American History
14th Street & Constitution Avenue NW
Washington, DC 20013
202.633.1000
http://www.americanhistory.si.edu
Admission: Free
Metro: Blue/Orange Lines, Smithsonian
Comments: Items from 200 years of American
existence; railroad engines to computers to WWII
and much more including the art of each period.

Smithsonian • National Museum of the American Indian
4th Street and Independence Avenue SW
Washington, DC 20560
202.633.1000
http://www.nmai.si.edu
Admission: Free
Metro: All lines except Red, L'Enfant Plaza
Comments: The cafeteria serves authentic Native
American dishes.

Smithsonian • National Museum of Natural History
10th Street & Constitution Avenue NW
Washington, DC 20013
202.633.1000
http://www.mnh.si.edu
Admission: Free
Metro: Blue/Orange Lines, Smithsonian

Smithsonian • National Portrait Gallery
8th & F Streets NW
Washington, DC 20001
202.633.1000
http://www.npg.si.edu
Admission: Free
Metro: Green/Red/Yellow Lines, Gallery Place/Chinatown
Comments: In the same building as the American
Art Museum. It houses the new portraits of the Obamas.

Smithsonian • National Postal Museum
2 Massachusetts Avenue NE
Washington, DC 20002
202.633.5555
http://www.npm.si.edu
Admission: Free
Metro: Red Line, Union Station
Comments: Washington's first post office, now
an active historic site providing exhibits,
lectures, and special family events.

Metro: Red Line, Dupont Circle

United States Botanic Garden
100 Maryland Avenue SW
Washington, DC 20001
202.225.8333
http://www.usbg.gov
Admission: Free
Metro: Blue/Orange Lines, Federal Center SW or Capital South
Comments: One of the few DC sites open before 11:00 a.m. on Sunday.

United States Holocaust Memorial Museum
100 Raoul Wallenberg Place SW
(14th Street & Independence Avenue)
Washington, DC 20024
202.488.0400
http://www.ushmm.org
Admission: Free, but requires advance time-entry pass.
Metro: Blue/Orange Lines, Smithsonian

United States National Arboretum
3501 New York Avenue NE
Washington, DC 20002
202.245.2726
http://www.usna.usda.gov
Admission: Free

NATIONAL/STATE PARKS AND HISTORIC SITES

Ford’s Theatre National Historic Site
511 10th Street NW
Washington, DC 20004
202.347.4833
http://www.nps.gov/foth
Admission: Free. Admission to theatrical performances is by paid ticket only.
Metro: Blue/Orange/Red Lines, Metro Center, Green/Red/ Yellow Lines, Gallery Place/Chinatown
Comments: The theater where President Abraham Lincoln was shot and the house across the street where he died early the next day are preserved as Ford’s Theater National Historic Site.

Franklin Delano Roosevelt Memorial
1850 West Basin Drive SW
Washington, DC 20024
202.376.6704
http://www.nps.gov/fdrm
Admission: Free
Metro: Blue/Orange Lines, Smithsonian

Frederick Douglass National Historic Site
1411 W Street SE
Washington, DC 20020
202.426.5961
http://www.nps.gov/frdo
Admission: Admission is charged. Reservation required.
Metro: Green Line, Anacostia; B-5 bus (Mt. Rainier)
Comments: Frederick Douglass lived at Cedar Hill from 1877 until 1895. His fully restored Victorian home on the heights overlooking Anacostia offers a panoramic view of the U.S. Capitol, the Washington Monument, and the city of Washington.

C & O Canal National Historical Park
Great Falls Tavern Visitor Center
11710 MacArthur Boulevard
Potomac, MD 20854
301.767.3714
http://www.nps.gov/choh
Admission: Free.
Comments: About 15 miles from the Mall, at the end of MacArthur Boulevard, are the Great Falls of the Potomac. A restored 19th century tavern was an important stopping point on the C&O Canal and is now a museum. Woodland paths and picnic areas are further features of the park, which is also a good starting point for hiking or cycling along the towpath. Great Falls is part of the larger Chesapeake and Ohio Canal National Historic Park, which runs for 184.5 miles from Georgetown to Cumberland, MD.

Great Falls Park, Virginia
9200 Old Dominion Drive
McLean, VA 22102
703.285.2965
http://www.nps.gov/grfa
Admission: Admission is charged.
Comments: Excellent views of the cascading Potomac. The park has a snack bar, restrooms, visitor center, picnic facilities, and hiking trails. Fishing is permitted, but swimming and wading are not.

202.426.6841
http://www.nps.gov/kwvm/
Admission: Free. Permits are required for special events and First Amendment activities.
Metro: Blue/Orange Lines, Foggy Bottom

Lincoln Memorial
2 Lincoln Memorial Circle
Washington, DC 20037
202.426.6841
http://www.nps.gov/linc
Admission: Free. Permits are required for special events and First Amendment activities.
Metro: Blue/Orange Lines, Foggy Bottom
National Zoo
3001 Connecticut Avenue, NW
Washington, DC 20008
202.633.2614 General Information
202.633.4111 Zoo Park Police (In stormy weather, call here to see if the zoo is open.)
http://nationalzoo.si.edu
Admission: Free, but there is a charge for parking.
Metro: Red Line, Woodley Park/Zoo or Cleveland Park.
Bus: L1, L2, and L4 buses at the Connecticut Avenue entrance; H4 bus at Harvard Street.
Car: Parking is very limited. From May to September, lots may be filled by 10:30 am.

Rock Creek Park
3545 Williamsburg Lane, NW
Washington, DC 20008
202.895.6070
http://www.nps.gov/rocr
Admission: Free
Comments: Established in 1890, Rock Creek Park offers 29 miles of hiking trails, 11 miles of bridle trails, tennis courts, athletic fields, and dozens of picnic areas. Rock Creek Horse Centre on Glover Road offers horse rentals and riding instruction. There is an 18-hole golf course with golf cart and club rental at 16th and Rittenhouse Streets. Reservations are required for the tennis courts. The Rock Creek Nature Center gives guided nature walks daily and has nature exhibits and planetarium shows. Demonstrations at Pierce Mill illustrate the working of a 19th century gristmill. Tours are given of the Old Stone House, the oldest dwelling in Washington.

Belmont-Paul Women's Equality National Monument
144 Constitution Avenue, NE
Washington, DC 20002
202.546.1210
http://nationalwomansparty.org
Admission: Free
Metro: Red Line, Union Station

Shenandoah National Park, Virginia
80 miles southwest of Washington via I-66 and US 340 or via I-66 and US 211
540.999.3500
http://www.nps.gov/shen/
Admission: Admission is charged.
Comments: Skyline Drive threads its way for 105 miles through the Blue Ridge Mountains. The park has campgrounds, mountain cottages, lodges, fishing, horse rentals, picnic spots, 94 miles of the Appalachian Trail, and 200 miles of park trails.

National World War II Memorial
17th Street between Constitution and Independence Avenues
Washington, DC
202.426.6841
http://www.nps.gov/wwii/index.htm
Admission: Free, Permits are required for special events and First Amendment Activities.
Metro: Blue/Orange Lines, Smithsonian

Established in 1980, the National World War II Memorial is a tribute to all those who served in World War II. The memorial features 56 pillars, each representing a state, territory, or commonwealth, and a reflection pool. The memorial is a popular destination for visitors from around the world.

The National World War II Memorial features a central plaza, a tourist office, and a gift shop. The plaza is surrounded by 56 pillars, each representing a state, territory, or commonwealth. The pillars are made of bronze and are 48 feet tall. The reflection pool is 21 feet deep and is surrounded by 19 large stone benches. The memorial is open daily from sunrise to sunset. Visitors can also purchase souvenirs and gift items at the gift shop located in the plaza.

The National World War II Memorial is a place of remembrance and reflection for all who have served in World War II. It is a symbol of the sacrifices made by our military personnel and their families.

The National World War II Memorial is located in the heart of Washington, D.C., near the Washington Monument. It is easily accessible by public transportation, with several metro stations within walking distance.
Theodore Roosevelt Island
c/o Turkey Run Park
George Washington Memorial Parkway
McLean, VA 22101
703.289.2500
http://www.nps.gov/this/
Admission: Free. Fishing permits are required for persons older than 16. Vehicles are not permitted on the island.
Metro: Blue/Orange Lines, Rosslyn
Comments: The parking area is accessible from the northbound lane of the George Washington Memorial Parkway on the Virginia side of the Potomac River. A footbridge connects the island to the Virginia shore. The island is also accessible to pedestrians via the Metro station at Rosslyn and a 20-minute walk following city streets to the Key Bridge, where the Mount Vernon Trail begins. Follow the trail to the island entrance.

Thomas Jefferson Memorial
900 Ohio Drive SW
Washington, DC 20242
202.426.6841
http://www.nps.gov/thje/
Admission: Free. Permits are required for special events and First Amendment activities.
Metro: Blue/Orange Lines, Smithsonian

United States Capitol
Capitol Hill, east end of the National Mall
Washington, DC 20226
202.226.8000
http://www.visitthecapitol.gov
Admission: Free. The Capitol is open for public tours, but a ticket is required. Tours are conducted Monday through Saturday from 9:00 am to 4:30 pm. Tickets can be obtained from the kiosk near the intersection of First Street SW and Independence Avenue.
Metro: Red Line, Union Station
Comments: The Capitol is the centerpiece of the Capitol Complex, which includes six Congressional office buildings and the three buildings of the Library of Congress.

Vietnam Veterans Memorial
5 Henry Bacon Drive NW
Washington, DC 20242
202.426.6841
http://www.nps.gov/vive/
Admission: Free. Permits are required for special events and First Amendment activities.
Metro: Blue/Orange Lines, Foggy Bottom
Comments: The Memorial also includes the Three Servicemen Statue and the Vietnam Women’s Memorial.

Washington Monument
Constitution Avenue at 15th Street NW
Washington, DC 20001
(Inclined pathways lead from the parking lot and 15th Street to the entrance and elevator.)
202.426.6841
http://www.nps.gov/wamo/
Metro: Blue/Orange Lines, Smithsonian
Comments: The Memorial also includes the Three Servicemen Statue and the Vietnam Women’s Memorial.

White House
1600 Pennsylvania Avenue NW
Washington, DC 20005
202.456.7041
http://www.whitehouse.gov
Note: Public tours must be requested through your state representative in Congress.
Visit https://www.whitehouse.gov/about/tours-and-events or call the number above for updates.
Metro: Blue/Orange Lines, Federal Triangle; Blue/Orange/Red Lines, Metro Center
Comments: Now anyone, anywhere, can experience the history and art of the White House via their computer. Take the virtual tour (http://www.googleartproject.com/collection/the-white-house/museumview/).

ACKNOWLEDGEMENTS
This document draws heavily on the work of others. We are grateful for permission to use (sometimes in modified form) sections from the Graduate Partnerships Program Handbook, the Postbac Handbook, and the 2017 Summer Handbook. We have also incorporated information from organization and NIH office websites in an attempt to provide the most accurate information possible. Shannon DeMaria, PhD, contributed to the writing, organizing, and editing of the handbook.
