

Examples of Appropriate Journal Club Titles

How Viruses Enter and Exit the Cell: Endo- and Exocytosis BALTIMORE: Animal Models of Age-Related Diseases

EXECUTIVE BOULEVARD: Summer Journal Club: Cancer Epidemiology: Etiology, Prevention, and Policy

Physiology of Inflammation and Stress Response

Listening to Your Genes in a Noisy World: Biological Control of Noise

Neurobiology of Addiction

Herceptin: The Story of One Drug's Journey from the Bench to the Bedside

Beyond the DNA Sequence: From Genetic Code to Epigenetic Regulation

Molecular Basis of Viral and Neurodegenerative Disease

ROCKY MOUNTAIN LABORATORIES (MONTANA): Impact of Gram-negative Protein Secretion on Pathogenesis

Innate Immunity- Microbial and Viral Sensing, the Good, the Bad, the Ugly Getting More with Less: Microarray-Based Gene Expression Profiling Protein Degradation by Chaperones & Proteases in Prokaryotes and Eukaryotes BALTIMORE: Hallmarks of Cancer and Drug Resistance

Dendritic Cells as Targets for Immunological Therapies Modeling Human Disease in Non-human Organisms Molecular Mechanisms Regulating Metastasis A Window into Computational Modeling in Neuroscience Infectious Disease Epidemiology

The Other Neuroscience: Glial Cells in Neurodevelopment and Neurological Diseases
