Mental Health Crisis for Grad Students

Study finds "strikingly high" rates of depression and anxiety, with many reporting little help or support from supervisors.

Researchers facing ‘shocking’ levels of stress, survey reveals

Nearly two thirds of those who took part had witnessed bullying or harassment

https://www.insidehighered.com/news/2018/12/06/new-research-graduate-student-mental-well-being-says-departments-have-important
https://www.theguardian.com/society/2020/jan/15
During late June, 40% of U.S. adults reported struggling with mental health or substance use.

- Anxiety/depression symptoms: 31%
- Trauma/stressor-related disorder symptoms: 26%
- Started or increased substance use: 13%
- Seriously considered suicide*: 11%

*Based on a survey of U.S. adults aged ≥18 years during June 24-30, 2020
†In the 30 days prior to survey

Key Findings

- Females
- ≤40 years
- Students

Increased

- Stress
- Depression
- Anxiety
- Adverse psychiatric symptoms
- PTSD

NOTE: Most vulnerable groups in US are 18 – 24 years, then 25 – 44 years old. Individuals from marginalized communities and those lacking financial resources.
Loneliness Is a Key Factor

- The most prominent factor for depression and anxiety
- Highly lonely individuals are 82% more likely to be susceptible to depression and anxiety

Impact On (Early Career) Scientists

- Impact of discipline\(^1\)
  - Bench science disciplines reported the largest declines in research

- Female scientists and scientists with young children reported greatest reduction in research time\(^1\)
  - COVID-19 medical papers have fewer women first authors than expected\(^2\)

- Hiring freezes/rescinding of job offers\(^3\)

---

Impact on International Students

- Even during non-pandemic times, international students are:
  - More prone to mental health issues (e.g., depression)
  - Struggling with the local medical system
  - Less motivated to seek psychological services

- During the pandemic:
  - More isolated with stress of physically being away from family
  - Less access to public resources due to monetary, informational, language, or cultural barriers.
  - Face increased discrimination (especially Asian trainees)
  - Increased uncertainty about future (e.g., visa status)

Chen et al. (2020). The overlooked minority: Mental health of International students worldwide under the COVID-19 pandemic and beyond. Asian Journal of Psychiatry
NIH COVID-19 Survey

- Half of all trainees (51%) experienced negative impact of being physically separated from coworkers.
- Negative impact on productivity
  - 69.4% of trainees reported having experienced lower productivity (vs. 19% for non-trainees)
- Career
  - 66.3% felt that the pandemic will have negative impact on their careers (vs. 22.7% for non-trainees)
- Job Satisfaction
  - 36.5% reported lower job satisfaction (vs 15.2% for non-trainees)
- Use of NIH services for mental health and wellness support
  - 67% using OITE services
  - Anecdotally, we know some trainees do not feel they can participate in our activities because they are during work hours
Seasonal Affective Disorder (SAD)

- Type of depression related to changes in season, usually winter
- ~12 million people per year

Symptoms:
- Feeling depressed most of the day
- Loss of interest in activities
- Low energy
- Problems sleeping
- Changes in appetite or weight
- Feeling sluggish or agitated
- Having difficulty concentrating
- Feeling hopeless, worthless, or guilty
- Having frequent thoughts of death or suicide
Protective Factors (I)

- The development and use of positive coping styles
  - OITE’s Resilience and Mental Health and Wellness series
  - Wellness Wednesday Lunches
  - Drop-in discussion groups
  - 8-week wellness support groups
  - Wellness skills groups
  - Individual wellness advising and referrals for more support
Protective Factors (II)

- The development and use of positive coping styles
- Enhanced social support
  - At the Lab/Branch/IC level (without discussing science)
  - OITE Buddy system for regular check-ins
  - Affinity group activities and supports for various communities
  - Important to engage in small group activities for conversation (not just one-way listening)
Protective Factors (III)

- The development and use of positive coping styles
- Additional social support
- Time to rest and recharge
  - Encourage time off, especially during daylight hours
  - Remember vacations even if travel is restricted
  - Be proactive about planning over the holidays
  - Support to develop and engage in hobbies
  - Careful attention to doom-scrolling
Protective Factors (IV)

- The development and use of positive coping styles
- Additional social support
- Time to rest and recharge
- Sense of (financial) stability
  - Understand that contextual factors do impact productivity
  - Address productivity issues up-front and with support
  - Discuss re-appointments and extensions early
  - Reach out about appointment flexibilities
  - Support parents by providing additional flexibilities
  - Give extra time and support to trainees interviewing remotely (less travel but more stress)
Protective Factors

- The development and use of positive coping styles
- Additional social support
- Time to rest and recharge
- Ability to get financial help when needed
Important OITE Resources

- Information at https://www.training.nih.gov/wellness
- Email OITE-WELLNESS@NIH.GOV for resources or an appointment with a wellness advisor

REMINDER: According to NIH COVID-19 survey, 67.2% of the trainees used OITE’s Wellness resources during the pandemic.

- Let’s make sure everyone who needs community and support has it!

More Community Resources

- **Postbacs: The Postbac Committee**
  - Postbacc_L for for Postbac Seminar Series, Social, Service, Outreach, etc.
  - ClubPCR Google Group for housing, carpooling, furniture, study materials, etc.
  - Club PCR Facebook Page for social activities
  - Instagram, Google Calendar, Slack

- **Grad Students: The Grad Student Council (GCS)**
  - Google Group: gs-underground (Email Kat Daly (kat.daly@nih.gov) or Katelynn McCann (katelyn.mccann@nih.gov) to join), Facebook: Graduate Student Underground, **GSC Slack Channel** (use your non-NIH email to join)

- **Postdocs: FELCOM**
  - Visit Facebook page: [Bethesda Postdocs](https://www.facebook.com/groups/bethesdapostdocs/)
  - Join their Slack page with channels for game/trivia nights, yoga and workout classes, Bethesda Postdoc Running Club, networking, and more: [https://join.slack.com/t/bethesdapostdocs/shared_invite/zt-h67vb550-GM_t9zGrTAQWMSdSBfa0bA](https://join.slack.com/t/bethesdapostdocs/shared_invite/zt-h67vb550-GM_t9zGrTAQWMSdSBfa0bA)
  - Visiting Fellow Committee is also having events--join this list to get more info: [https://list.nih.gov/cgi-bin/wa.exe?A0=visitingfellows](https://list.nih.gov/cgi-bin/wa.exe?A0=visitingfellows)
    - Social events monthly, movie club, more!
Current Wellness Support Groups

- Dealing with transitions
- Imposter fears
- Grad student support
- International trainees
- Being alone/feeling lonely

To join, email OITE-WELLNESS@NIH.GOV
Skill Development Groups

- Starting soon
  - Mindfulness
  - Stress management and wellness

- Coming in January
  - Emotional regulation
  - Assertiveness

Register at https://www.training.nih.gov/wellness_skill-building_groups
Drop-In Group Topics

- Addictive habits
- Anxiety & Depression
- Application Stress Management
- Difficult Relationships & Difficult Conversations
- Graduate Student
- Habits and habit formation
- International trainees
- Imposter Fears & Cognitive Distortions
- Self Compassion
- Trainees of Color
- Uncertainty (Covid and beyond)
